

# 335-070 / 335-069 Table Leg Instructions

2 Folding Table Legs  
(1 leg will be shorter than the other)

Hardware:  
2 - U Brackets (for taller leg)  
2 - Flange brackets (for shorter leg)  
4 - Leg base inserts  
16 - Bolts  
16 - Nuts

Picture of how flange bracket attaches to shorter leg.

Reason for different size legs:  
In order for the table's legs to fold over each other, one leg must be shorter than the other. The flange bracket makes up the size difference in the legs allowing them to fold properly.
