

MAKERTRON
Makerspace mobile cabinet

A REVOLUTIONARY SOLUTION FOR TODAY'S COLLABORATIVE CLASSROOM

In many situations, access to spaces such as maker spaces, FabLabs, Innovation Hubs, and media spaces are restricted. **MakerTron** brings the STEM/STEAM experience into the classroom. The fully collapsible mobile unit is situated to move around the classroom, library, or school. The completely folded **MakerTron** fits through most standard doorways and can easily be wheeled into any space.

The heavy-duty frame and sturdy construction support the rigors of a physically active maker space. Everything from paints, tools, and manipulatives to robotic parts and supplies can be stored in **MakerTron's** flexible storage cabinet. Unfold and open the **MakerTron** Cube to reveal the amazing opportunities to begin your STEM/STEAM experiments. **MakerTron** comes complete with peg walls to organize and display tools, two whiteboards for demos, and spacious, lockable cabinets and drawers for storage.

MAKERTRON FINISHES

The time is now to shift and build a better tomorrow! Learn by doing with **MakerTron**. We encourage you to design your own finishes and colors from our large selection of durable laminate options.
